Summary

I am a Front-End Developer, specializing in transforming sophisticated design concepts into clean, functional, and high-performing web code. Possessing a solid foundation in HTML5, CSS3, and JavaScript, alongside practical proficiency in React, I have successfully delivered a portfolio of accessible and responsive user interfaces. I am actively seeking my first professional role to leverage my strong technical base and dedication to continuous learning, making measurable contributions to a dynamic development team

Work Experience

Informatics Instructor | Bahjat Al-Bitar School (2026)

- Delivered computing lessons to students over 100 days, simplifying complex technical concepts.
- Enhanced public speaking and information-sharing skills within a professional environment.

Relevant Projects

Manage Posts – Full CRUD Data Management Application

2025

- Full CRUD application using **Vanilla JS** and **Fetch API** for data management.
- Designed an intuitive UI for efficient data entry and external **API** communication.

<https://loujain-alrefae.github.io/manage-posts/>

Stories & Interviews Platform (React Single Page Application)

2025

- Developed intuitive authentication UI components (Sign In/Sign Up pages) within a **React** environment.
- Managed application state flow and smooth navigation using **React** principles (Props and State)

<https://loujain-alrefae.github.io/stories-and-interviews/>

Product Management Dashboard (Production-Ready)

2025

- Built a CRUD dashboard using **React**, **Axios**, and **Tailwind CSS**.
- Implemented Auth flow, Dark/Light mode, and Toast notifications..
